

Hungarian Higher Education 2008

Dear Reader,

It gives me great pleasure to welcome you in the name of the Hungarian Rector's Conference.

The main task of the Hungarian Rector's Conference is to represent higher education institutions and their interests. The heads of these institutions form our constituency and ensure our operation.

In line with our goals we trust this publication will contribute to the ongoing good relationship and efficient cooperation between our member higher education institutions and their potential partners.

We hope this publication will prove to be valuable and useful.

Best regards,

DSc. Károly Molnár,
Chairman of the Hungarian Rectors' Conference

Introduction

Comparability. Comparability of our purposes, traditions, the possibility to compare our goals and achievements with other EU countries and international standards. In recent years the most important issue in Hungarian higher education has been the implementation of the reforms defined by the objectives set in the Bologna Declaration in 1999. The Bologna Process enables Hungarian tertiary education to take part in shaping the European Higher Education Area to create a more comparable, compatible and coherent system of higher education in Europe.

Hungarian higher education has a long history, with the first Hungarian university founded over 600 years ago, in the 14th century. With a long tradition and high standards of education, Hungary has made a substantial contribution to the world's intellectual heritage. As an example 13 Nobel Prize laureates were born in Hungary, among them acclaimed litterateurs and scientists. Hungarian diplomas have high prestige throughout the world, the programmes are of high standard and tuition fees quite favourable by international standards. Consequently, many foreign students choose to study in Hungary to take valuable degrees. In the 2006/2007 academic year more than 15,000 foreign students from over 118 countries took part in the Hungarian higher education system – 79% of them European, 16% Asian, 3% North-American. The demand for tertiary education in Hungary has significantly increased during the 1990s. In order to meet policy objectives of expanding higher education and improving labour market chances for the greater number of young people born in the late 1970s and 1980s, enrollment opportunities have been made more accessible. In 2006/2007 there were 238,000 students in full-time tertiary education, this number is almost triple the 1990 figure.

Foreign students in Hungarian tertiary education Top 10 countries, academic year 2006/2007

Country of origin	Number of students
Romania	3294
Slovak Republik	2296
Germany	1520
Ukraine	1475
Serbia	1205
Israel	754
Norway	715
Iran	496
Cyprus	293
Sweden	270

Numbers of Hungarian students enrolled in tertiary education in the 2006/2007 academic year

Institutions	71	
Teachers	22 076	
Number of students	416 348	
of which	BSc programmes	91 365
	Higher level vocational training	10 842
	University level education	121 131
	College level education	163 323
	Specialized further training	21 903
	PhD (DLA) programmes	7 784

Source: Hungarian Central Statistical Office

This booklet is intended to arouse your interest in the Hungarian tertiary education. For your reference, we have provided a complete list of higher educational institutions. This includes the address, contact information, web page. Additional information such as year of foundation, number of students and lecturers with scientific degrees etc is also included. You may also find some detailed information, a brief introduction of faculties, doctoral programs, scientific research and international relationships on major institutions.

Hungarian Higher Education 2008 presents the 70 institutions organised according to the seven statistical regions of Hungary. Each region is sub-divided into three coverage-categories by size. Furthermore it is also stated, whether the institution is state or privately owned.

Finally, it is important to recall that the accomplishment of the Bologna Process in Hungary is still ahead. Consequently, among the programmes the institutions offer, you may find traditional degrees such as university degrees equivalent to master's degree and traditional college degrees equivalent to bachelor's degree.

We hope this booklet is of interest and benefit to you as a prospective student, teacher or potential business partner. Furthermore, that the information provided is sufficient to take your next step towards greater involvement with Hungarian higher education.

State

Budapest Business School

Type of programs and degrees

Bachelor's degree, Master's degree, College degree (traditional), Master's level further specialization, Higher level vocational training, Adult training and education

Faculties, institutes

College of Commerce, Catering and Tourism, College of International Management and Business Studies, College of Finance and Accountancy (The latter College has an institution in Zalaegerszeg and one in Salgótarján)

Short introduction

The mission of the Budapest Business School, which strives to become a leading higher educational institution in Hungary and in Central Europe, is to train students who, on completion of their studies, will be well versed in business studies and disciplines related to them, and thus will be able to fill positions in businesses, local and government administration.

Scientific research, international relations, projects

The professors and the teaching staff of the BBS consist of highly qualified specialists of their respective fields of study. BBS has extensive connections with various local business organisations and professional bodies, and also close connections with a number of universities and professional organisations abroad. This is proven by the large number of international projects in which the BBS has taken part. BBS is a leading school in respect to student and staff mobility too, within the ERASMUS projects.

Short introduction

Thorough grounding and human quality of engineers, economists and engineering teachers form the trademark of the college. The mission of BMF is to create a stimulating studying environment for development of abilities and for many-sided development of personality of students. In education the main profile is the BSc diploma, and on faculties possessing the required personal and material conditions the participation in the MSc and PhD student. BMF takes part in accredited higher professional training, in further vocational training and in adult education

Scientific research, international relations, projects

The scientific research projects of Budapest Tech are even internationally remarkable. Besides the scientific research connected to the educational profile the applied research activities in cooperation with industrial partners are growing significantly and continuously. The Transportation Informatics and Telematics University Knowledge Center with the internationally recognized research communities of Budapest Tech in co-operation with its industrial partners organize and implement various R&D and innovation oriented projects resulting in high level intellectual added value.

Non-state

Type of programs and degrees

Bachelor's degree, Master's degree, College degree (traditional),
Master's level further specialization, Adult training and education

Short introduction

King Sigismund College in Óbuda, which was founded in 2000, offers from September 2008 ten BA programs, four MA programs and nine postgraduate professional non-degree programs in various fields of study in economics, arts and humanities. The college also operates as an accredited language exam site for the Budapest University of Technology and Economics. The number of faculty members with academic degrees is high. In order to continuously enhance quality development, King Sigismund College has been awarded with the ISO 9001:2000 qualification.

Liszt Ferenc Academy of Music (University)

1061 Budapest, Liszt F. tér 8., +36 1 462-4600
rektor@lfze.hu, www.zeneakademia.hu

Head of the institution: Dr. András Batta, rector
Students 2007/2008: 800 persons
Sc. degree lecturers 2007/2008: 88 persons
Foundation year: 1875

State

Type of programs and degrees

Bachelor's degree, Master's degree, College degree (traditional),
University degree (traditional), PhD programs, DLA, Master's level further specialization, Adult training and education

Short introduction

The Franz Liszt Academy of Music trains students at several levels of study and encompasses various curricular requirements and types of courses in classical, ethnic, jazz and church music and theory. The primary objective of the Academy is to build on the technical gifts of students in order to continue the transformation from competence to artistry and teaching. Learning is an ongoing process at the Franz Liszt Academy of Music. It is a process that elevates performance, one that is equally rewarding for students and their teachers. It is one that persists long after graduation, as students become teachers and performers themselves.

Moholy-Nagy University of Art and Design

1121 Budapest, Zugligeti út 9-25., +36 1 392-1180
kancellaria@mome.hu, www.mome.hu

Head of the institution: Gábor Kopek, rector
Students 2007/2008: 851 persons

Kodolányi János University College

Type of programs and degrees

Bachelor's degree, College degree (traditional), Master's level further specialization, Higher level vocational training, Adult training and education

Faculties, institutes

Institute of Liberal and Performance Arts, Institute of Social and Media Studies, Institute of Economics and Tourism, Institute of Pedagogy and Applied Social Studies, Institute of Modern Languages

Short introduction

Kodolányi János University College, as one of the leading non-profit higher education institutions, wants to become a nationally acknowledged internationally recognised applied research university providing an expert consultation facility and an educational and research excellence centre. The mission of KJUC is to contribute to the competitiveness of the European higher education area and the international integration of Hungarian higher education.

Scientific research, international relations, projects

The research of city regions inequality, the programmes of the Historical Workshop and the Post-modern Research Centre stand out among the research programs. The organization of the National Scientific Students Conference was a significant task of KJUC. Other facts in 2007: Number of tenders handed in: 36. Number of successful tenders: 10. Participants in doctorate programmes: 53. Number of PhD defences: 7. Number of Erasmus partners: 89. Number of outstanding bilateral agreements: 41.

University of Pannonia

Type of programs and degrees

Bachelor's degree, Master's degree, College degree (traditional), University degree (traditional), PhD programs, Master's level further specialization, Higher level vocational training, Adult training and education

Faculties, institutes

Faculty of Arts, Faculty of Economics, Georgikon Faculty of Agricultural Sciences, Faculty of Engineering, Faculty of Information Technology

Doctoral programs

Doctoral School in Animal and Agricultural Environment Sciences, Doctoral School in Management Sciences and Business Administration, Doctoral School in Information Technology, Doctoral School in Chemistry, Doctoral School in Environmental Sciences, Doctoral School in Molecular- and Nanotechnology, Doctoral School in Crop and Horticultural Sciences, Doctoral School in Philology and Educational Sciences, Doctoral School in Chemical Engineering and Material Sciences

Scientific research, international relations, projects

The University of Pannonia, as a centre of research and a key contributor to economic development, facilitates the cooperation of businesses, the local authorities and the central government in both regional and international programs in education, research, and development. The institution's aim is to further strengthen its current position in the social and cultural development of the region. The University reacts flexibly to the needs and demands of society, it serves as a link between scientific and business communities, and it maintains close relations with neighbouring countries.

College of Dunaújváros

Foundation year: 1969
 State

Type of programs and degrees

Bachelor's degree, Master's degree, College degree (traditional),
Master's level further specialization, Higher level vocational training,
Adult training and education

Faculties, institutes

Institute of Material Science and Metallurgy, János Déri Institute
of Communication, Institute of Mechanical Engineering, Institute
of Informatics, Institute of Economics, Institute of Mathematics,
Institute of Languages, Institute of Teachers Training, Department of
Natural and Environmental Sciences, Institute of Management and
Entrepreneurial Studies.

Short introduction

As an independent institution, with the educational and infrastructural
investments, the College became a student-friendly European
Campus, intellectual and innovation centre of Dunaújváros and the
region. The students' life is governed by the more than 250-year old
Selmec's student traditions. First among the Hungarian state institutions
of higher education, the College has been in possession of the ISO
9001:2000 quality management certificates since spring 2003.

Scientific research, international relations, projects

In 2006 the Dunaújváros Regional Knowledge Centre of Materials
Science and Technology was established. Besides, the institute
works on the following R&D and innovation research: mechanical
engineering, mechatronics, environment protection and energy
rationalising, informatics, educational technology, media sciences,
social sciences, economics and management, logistics and applied
linguistics. The College also participates in research projects and
student-teacher mobility in the frame of Leonardo and Erasmus
programmes and bilateral agreements. Due to the extensive
international partnership the institution offers BSc courses in English
for foreign students.

Short introduction

The College for Modern Business Studies bases its training
programs and objectives on the requirements of modern market
economies. The most important goal of the undergraduate
courses is to train economists with in-depth academic knowledge,
an experience in business practices, fluency in foreign languages,
good communication skills and the ability to run their own
enterprises. Students can choose to take their undergraduate
training either in the program of Commerce and Marketing,
Economics and Management and International Economics. From
the year 2008 technician training also starts.

Faculties, institutes

Faculty of Arts, Faculty of Economics and Social Studies, Faculty of Engineering and Agriculture, Faculty of Teacher Training, Faculty of Natural Sciences

Short introduction

Building on past experience, its values and on the results of its developments, College of Nyíregyháza wants to become the higher education knowledge centre of the country and the North-East Region of Hungary. The college is aware of the social and economical situation in the region and so, it can fully contribute to the assurance of the human resource necessities of the knowledge-based economy, to the strengthening of the local innovative processes and through this, it can catch up with the more developed parts of the country.

Scientific research, international relations, projects

The strategy of the research and development is the realization of the targets determined in the Institutional Development Plan (IDP), which helps to increase the institution's academic program ("Equal Opportunities"), the North Great Plain Region's role ("Green Region") and the economical and innovative efficiency of the labour market ("Dynamic Network"). The college built a significant partner network. These partner institutions make possible to exchange the leadership and management experiences and also to extend the professional cooperation in the field of education and research.

Faculties, institutes

Agriculture, Agroecconomics and Rural Development, Arts and Humanities, Economics, Education, Engineering, Dentistry, Health, Information Science, Law, Medicine, Music, Pharmacy, Public Health, Science and Technology.

Doctoral programs

Doctoral (PhD) studies are organized in 24 doctoral schools. The University awards doctoral degrees in 6 scientific areas (agriculture, engineering, humanities, medicine, sciences, and social sciences) and 25 different scientific branches. The annual number of doctorates is between 150 and 200.

Scientific research, international relations, projects

The R&D activity of the university gained international esteem in all scientific areas, with about 7-800 projects running parallel. Its R&D income represents 16-17 % of the total R&D income of Hungarian HEIs, and it increases year by year. Several projects have received international support, nearly 50 of them are financed by the EU framework programs. Two regional university-based knowledge centers operate, while the Hungarian Academy of Sciences supports 11 research groups at UD. The University has more than 100 bilateral agreements with universities abroad, and it is a member of several international organizations.
